XENOMETRIX

Newsletter

Issue 1 / June 2009

Dear customer,

Welcome to the first edition of the Xenometrix E-Newsletter in the field of mutagenicity and cytotoxicity assays for the Pharmaceutical, Chemical, Cosmetic, Environmental, University, Food and Biotechnology sector.

There is a lot of new information to share with you as Xenometrix continues to grow: You will find information about new products, workshops, congresses, publications. We hope to see you at the meetings or to hear from you directly - please feel free to phone or email us (+41 61 482 14 34, info@xenometrix.ch).

Kind regards from Switzerland
Xenometrix AG

Xenometrix wins the 2009 Frost & Sullivan European Drug Discovery Product Innovation Award!

The award is in recognition of the company's active role in the production of single and multiple endpoint cytotoxicity assays, like the CYTOTOX PAN I kit.

The PAN I cytotoxicity kit allows the application of 4 commonly used cytotoxicity assays sequentially on a cellular sample. Such an approach enhances the probability of identifying toxic compounds, reduces consumption of valuable primary cells, uses less test compounds than with individual assays and removes inter-assay variability due to differences in cell composition, cellular activity and cell density. Frost and Sullivan are known for doing large marketing studies and reports and they have been an industry standard for some time.

PAN I Kit

The PAN I kit measures Lactate Dehydrogenase (membrane integrity), XTT (mitochondrial activity), Neutral Red (lysosomal activity) and Sulforhodamine (protein content). The ready to use kit includes all reagents necessary to perform the assay. A detailed instruction manual is also included in the kit.
