XENOMETRIX

Newsletter

Issue 6 / Januar 2010

Dear customer,

In our sixth newsletter we present the novel Ames MPF 98/100 Aqua kit for testing of unconcentrated water samples. Until the end of March 2010 you will receive free-of-charge S9 and positive controls with each Ames MPF 98/100 Aqua kit! Also, we introduce bulk chemicals of XTT, MTT, Crystal Violet, Sulforhodamine and Neutral Red within our cytotoxicity line for cost-efficient testing and high sample throughput.

There will be various opportunities to meet and discuss with us at the upcoming SOT meeting in March. We would be happy to welcome you at the Aniara/Xenometrix booth to inform you on our latest products.

For further information please feel free to contact us by phone +41-61-482 34 14 or by email: info@xenometrix.ch

Kind regards from Switzerland

Ames MPF 98/100 Aqua: New Mutagenicity Test Kit for the Testing of Water Quality

Xenometrix introduces a new liquid microplate kit version of the Ames MPF 98/100 assay. The Ames MPF 98/100 AQUA is designed to detect the mutagenic potential of non-concentrated water samples. The assay allows to use 18.5 times more sample volume than with the conventional Ames MPF 98/100 for testing of chemical compounds thanks to a 10-fold concentrated Exposure Medium. The assay uses *S. typhimurium* TA98 and TA100 for the measurement of base-pair substitutions and frameshift mutations.

The assay may be used for the testing of sterile aqueous solutions, such as fresh water, waste water, aqueous extracts and leachates, aqueous solutions of chemicals and chemical mixtures.

Special Offer: Pay the price for a basic kit and receive the S9 and positive controls free of charge until March 2010 !

Xenometrix offers you the rat liver S9 and positive controls included in the Ames Kit free of charge until March 2010. Pay the price for a basic kit and receive the S9 and positive controls for free!

Bulk chemicals for cytotoxicity assays

In addition to the ready-to-use cytotoxicity kits with single or multiple endpoints, Xenometrix offers also bulk reagents for your in-house assays (approximately 10'000 determinations):

XTT powder	500 mg	EUR	259.00
MTT powder	500mg	EUR	58.00
Crystal Violet	2.5g	EUR	98.00
Neutral Red 0.3% solution	40ml	EUR	98.00
Sulforhodamine B	2g	EUR	98.00

Congresses

We are looking forward to welcome you at the Xenometrix stand at the following events:

SOT 49th Annual Meeting and ToxExpo, 7th - 11th March 2010,
Salt Palace Convention Center, Salt Lake City, USA, exhibition
together with Aniara

What's up besides business

The yearly Fasnacht (Carnival) is the most important celebration for many people of Basel. On Monday, February 22nd, 2010, the city rises with the "Morgestraich". At four o'clock sharp in the morning all the lights in the city go out and a colourful and brilliant procession through the streets of the city begins.

The celebrations take place for three full days (and nights) accompanied by the sound of thousands of drums and piccolos creating a carneval atmosphere unique in the world.
