XENOMETRIX

Newsletter

Issue 11 / June 2011

%Anrede%

This eleventh Xenometrix E-Newsletter presents a cost comparison of the traditional Ames test and the Ames II / Ames MPF assay in the liquid microplate format which can be done with significantly less compound, less hands-on time, less S9, less waste, and consequently less costs.

Xenometrix will be present with a stand at the Eurotox in Paris at the end of August.

If you would like any further information from Xenometrix, please call us at +41 61 482 14 34 or email info@xenometrix.ch.

To avoid that our newsletter ends in your spam, please add the email address info@xenometrix.ch to your personal white list.

Higher cost efficiency for testing compounds with Ames MPF / Ames II

The standardized, ready-to-use Ames MPF and Ames II kits come in a liquid microplate format. They offer the following advantages as compared to the traditional assay: The kits include quality controlled *S. typhimurium* or *E. coli* strains and ready-to-use media. Optionally, S9, a S9 cofactor kit, and positive controls are also available. No in house quality control by the customer is required. The Ames MPF / Ames II require less test compound: only 4 or 10 mg test compound per strain (with a top dose of 2 or 5 mg/ml, triplicates, +/- S9). A major reduction in price results from a significant lower consumption of liver S9. A further reduction in price results from the significantly less hands-on time and from faster and much easier reading of results. A third contribution to price reduction comes from the 6-fold reduced volume of contaminated plastic ware and thus reduced disposal costs.

Xenometrix Ames MPF / Ames II training on July 21st, 2011

Xenometrix offers Ames MPF / Ames II or cytotoxicity assay trainings in our labs in Allschwil, Switzerland or in customer's lab. The next Ames MPF / Ames II workshop at Xenometrix will take place on July 21st 2011. Please inquire if you are interested to participate.

Congresses

We are looking forward to welcome you at the Xenometrix stand at the following event:

Eurotox Paris, Palais de Congrès, 28th to 31st of August 2011
