

Dear Reader,

This week NEW at Xenometrix!

1. New - Miniaturized in vitro Micronucleus Test - Screening Service
2. Miniaturized Ames MPF Test - most convenient model for automation
3. Automation of Reading and Archiving Ames MPF/Ames II Test Results

New - Miniaturized in vitro Micronucleus Test - Screening Service

- Profit from a short turnaround time: 2-3 weeks
- Economize your test compound: 40 mg
- Decrease costs: 3-fold lower price as compared to regular MNT
- Including telomere and centromere staining in micronuclei
- Identify the genotoxic mode of action: clear discrimination of Aneugens and Clastogens
- Human cell-based model: lymphocytes in whole blood

Miniaturized Ames MPF Test - most convenient model for automation

- Automate your Ames test with Epimotion™ and reduce hands on time
- Let a remote pipettor transfer the liquids from 96-well sample plate to 24-well and 384-well plates
- Miniaturize your Ames Test with Ames MPF, the most convenient model for automation
- Reduce test compound quantity, S9 and plastic waste

Automation of Reading and Archiving Ames MPF/Ames II Test Results

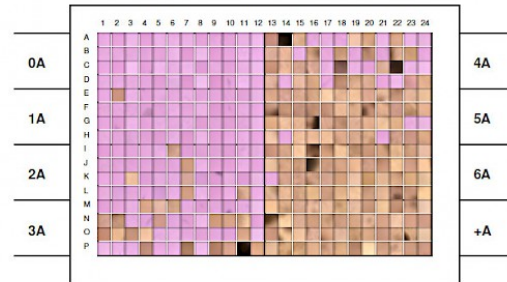

- Automate Reading and Archiving Results with Metafer and reduce hands on time!
- Metafer scans specimen of various sizes, uses many different contrasting methods and magnifications
- Modularity allows applications for cytogenetics, hematology, pathology, toxicology, microbiology
